Together, We're Helping Health Happen

Through participation in our Calendar of Caring programs, our valued customers have helped raise over **$800,000** to help health happen!

Henry Schein Cares, our global corporate social responsibility program, is a source of pride for Team Schein Members around the world. Through many activities, we "help health happen" by expanding care to underserved populations.

One way our customers can assist the important work of Henry Schein Cares is through participating in our Calendar of Caring programs. Throughout the year, we offer special products for purchase, a portion of which will be donated to the Henry Schein Cares Foundation in support of health-related causes. Together we can do more!

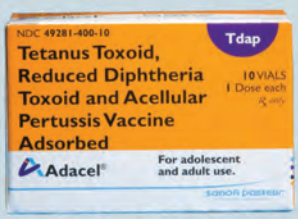
Despite high rates of reported pertussis in a recent decade, **vaccination** rates remain low.

The ACIP recommends Tdap vaccination for adults and adolescents, including healthcare providers



- Adults 19–64 years of age should receive a single dose of the Tdap booster, especially adults who have or anticipate close contact with infants <12 months of age
  — When possible, women should receive Tdap before becoming pregnant
- Adolescents 11–18 years of age should receive the Tdap booster, with the preferred age of vaccination at the 11–12 year visit
- Health-care providers in hospitals or ambulatory-care settings who have direct patient contact should receive a single dose of Tdap
- Tdap is preferred to Td for tetanus prophylaxis in wound management Source: www.cdc.gov

Pharmaceutical Refrigerator

Uniform storage unaffected by ambient temperature. Microprocessor controlled: An electronic sensor accurately monitors chamber temperature and feeds the information to the microprocessor for precise control at preset temperature. Fans ensure gentle air circulation to provide uniform top-to-bottom temperature control after frequent door openings. Sanyo's easily calibrated, reliable, and stable controls make validation easier. A highly efficient hermetic compressor, specially designed and developed by Sanyo, is utilized to provide powerful and rapid cooling to maintain proper temperature level.

Announcing SurGuard®3 Safety Needles from Terumo

With 3 ways to activate and a broader range of sizes than most other brands, SurGuard®3 is the industry's most adaptable safety needle. Add separate thumb and finger grips, unequalled sharpness,* and competitive pricing, and you'll understand why we say SurGuard®3 is the one needle that fits *every* clinician's style.

Plus, SurGuard®3 has the sharpest needles among major brands tested*

- 10% sharper than similar needles from other leading brands
- More comfortable injections for patients

Bottom line: No matter what you're looking for in a needle, you're looking for SurGuard®3.

For more information, contact your Henry Schein Representative.

SurGuard®3
SAFETY HYPODERMIC NEEDLE

*Independent Lab Testing: Terumo needles, on average, sharpest among brands tested.

Aaron 940™

Designed and engineered to be the most reliable and durable desiccator available today, the unit's life is prolonged by incorporating the latest in chip technology and reducing the number of internal parts, thereby generating less internal heat. Postprocedure and long-term cleanup are simplified by its nonabsorbing, nonstaining, high-impact plastic case. It continuously monitors every aspect of the unit's output. At the sign of any problem, the machine instantly disables the output and displays the appropriate error code on the display. The Bovie® 3-Button Handpiece is better designed inside and out. The basic function of a 3-button handpiece is to allow the user to control power up/down and to activate the high-frequency desiccator. The Aaron 940™ has a technology advantage right in the handpiece: a superbly engineered collet that's even gold-plated for superior conductivity. The collet is attached to the circuit board and the entire handpiece is encapsulated and formed in a high-tech polymer that combines comfort with a sure grip. The buttons on the handpiece have been designed for superior tactile feel and comfort.

AARON 950™ High-Frequency Electrosurgical Generator

First high-frequency desiccator with Cut. It features Cut, Blend, Coagulation (60 W each), Fulguration/Desiccation (35 W), and Bipolar (30 W) modes with 6 presets for the veterinarian's favorite settings. Easy-touch color-coded membrane pads, on front panels, allow for quick selection of each setting. Power output may be increased or decreased via the 3-button handpiece or the rotary power-control dial. For maximum flexibility, a complete line of disposable and reusable electrodes (blade, ball, needle, and loop) and bipolar forceps are available.

Alere™ Triage® MeterPro™ Meter
High-performance, comprehensive cardiovascular and drugs-of-abuse testing in the laboratory or at the point of care (POC). Designed to provide diagnostic results quickly and easily. Quantitative diagnostic panel results are displayed and printed in easy-to-read numbers and highlighted when the result is above the cutoff. Qualitative diagnostic panel results are displayed as positive (POS) or negative (NEG), eliminating the need for interpretation of lines that often hamper qualitative diagnostics.

- 16 immunoassays available
- Results in about 15 minutes
- Whole blood, plasma, or urine
- Customizable test panels
- Onsite training and implementation support
- Results printed, displayed, and interfaceable
